	Scott Kastler	1793				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Objections

Claim 1 is objected to because of the following informalities: The term "the internal tube" on lines 12-13 of the above claim, lacks proper antecedent basis.

Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art of the instant disclosure in view of either of Pitzer et al or Kitamura et al. The admitted prior art of the instant disclosure, as recited on page 1 paragraph 5 for example, teaches a tuyere including a nest block, said block being provided with a sleeve incorporated therein and formed by coaxial metal tubes provided with at least one central operating channel and at least one annular operating channel each separately connected to gas supply means, thereby showing all aspects of the above claims except for the provision of an additional internal tube of encased refractory or the recited shapes of either of the tubes (larger rear ends and smaller forward ends). Each of Pitzer et al (30) and Kitamura et al (in the embodiment of figure 6 for example) teaches that the inclusion of a central encased refractory component within a tuyere device for improving tuyere operation was an expedient known in the art at the time the invention was made, with respect to the instantly claimed channel shapes or configurations, since the channels of the

Art Unit: 1793

applied prior art operates in substantially the same manner with substantially the same stated results, motivation to alter the shape of the channels of the prior art to any other desired equally useful shape would have been a modification obvious to one of ordinary skill in the art at the time the invention was made since it has been well settled that where no new or unexpected results are shown to arise therefrom, motivation to alter the shape or configuration of a component shown by the applied prior art to any other equally useful shape would have been a modification obvious to one of ordinary skill in the art at the time the invention was made. See MPEP 2144.04 IV B. Therefore, motivation to employ a central refractory component as taught desirable by ether of Pitzer et al or Kitamura et al, in the tuyere assembly taught by the admitted prior art of the instant disclosure, including coaxial tubes of any desired equally useful shape or configuration, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
